Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Claims 1-11 are pending in this communication filed 08/07/01.
2. The IDS filed 10/21/02 has been reviewed and entered.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, and 6, drawn to a method to establishing a stock exchange to handle an exchange of shares representing currency, classified in class 705, subclass 37.
 - II. Claims 3, 4, 7, and 8, drawn to a method for listing on a stock exchange with exchange shares and hosting a predetermined number of market shares, classified in class 705, subclass 35.
 - III. Claims 9, 10, and 11, drawn to a method and system for performing the currency exchange by placing a request with a broker and determining an amount of native currency that can be received, classified in class 705, subclass 39.

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as establishing on the stock exchange a predetermined number of exchange shares and establishing a predetermined number of market makers, subcombination II has separate utility such as listing on a stock exchange a

Art Unit: 3693

predetermined number of exchange shares and hosting a predetermined number of market makers and Subcombination III has separate utility such as performing the currency exchange by placing a request with a broker, having the broker pass the request to a market maker and having the market maker execute the request, determining an amount of native currency and the number of shares of a second exchange share, and simultaneously submitting a request to sell the specified number of shares of the first exchange share. Invention I can be used to establish the stock exchange with a predetermined number of exchange shares and a predetermined number of market makers and a predetermined number of exchange shares while invention II once the stock exchange has been established can allow individuals to exchange currency and list on the stock exchange a predetermined number of exchange shares and host a predetermined number of market makers and invention III can be used for placing a request with a broker, having the broker to pass the request to a market maker then have the market maker execute the request and by performing the currency exchange determining the amount of native currency and simultaneously submit the request to sell a specified number of shares of the first exchange share. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a

Art Unit: 3693

continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application; such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and the search for Groups I and III is not required for Group II and the search for Group III is not required for Group 1 and Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3693

Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ella Colbert whose telephone number is 571-272-6741. The examiner can normally be reached on Monday, Tuesday, and Thursday, 5:30AM-3:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
